(57) Abstract :

The present invention relates to the development of herbal mouthwash or mouthrinse formulation for maintaining oral hygiene. It particularly relates to the development of Mentha arvensis (pudina) extract mouthwash or mouthrinse for reducing the cariogenic flora like Streptococcus mutans, Candida albicans, plaque inhibition and maintaining gingival health on children. It more specifically relates to the Mentha arvensis ethanolic extract mouthrinse formulation for reducing the cariogenic flora like Streptococcus mutans, Candida albicans, plaque inhibition and maintaining gingival health on children. The invention also pertains to the development of suitable process for preparation of the Mentha arvensis (pudina) ethanolic extract mouthrinse formulation for inhibition of Streptococcus mutans, Candida albicans, Plaque & maintaining Gingival Health. The present invention herbal pudina extract mouthrinse formulation is helpful for maintaining oral hygiene.
